

Every smile has a story...

What's yours?

Every day we meet people who touch our hearts and lives in a special way. The stories behind the smiles is why we at Dr. Marzban's office are so passionate about what it is we do from day to day. Changing lives one smile at a time is only the beginning of our commitment to our patients. Here is a smile story we would like to share with you.

Gary has been a patient in our office for over 13 years. About 3 years into our Doctor-Patient relationship, Gary confided in me that he was embarrassed of his smile. He felt that his teeth looked like “cocker-spaniel teeth”. Despite Gary’s meticulous oral hygiene, he had ground all of his teeth down to 20% of their normal length! With my training in neuromuscular dentistry, I was able to predictably create a new smile that not only fit Gary’s face and personality, but a smile that would also stand the test of time. Over 7 years after completing his journey to a new smile, Gary is still overjoyed with his stunning smile, and confidently shares his smile story with everyone he meets! Gary is an inspiration to our team, and a reminder to us of how changing one’s smile can positively impact their lives.
